**DNP**  
DUPAGE NARCAN PROGRAM

Though one year's statistics does not predict the future, this significant decrease in overdose related deaths is the first positive turn since we began collecting data in 2012. Many people have worked tirelessly to fight this epidemic, and this decrease may be the result of the years of united efforts and resources dedicated to combating this crisis."

2023 ANNUAL REPORT

## 2 Overdose Fatality Review Team

The Overdose Fatality Review Team has a goal of better understanding substance use disorder in our community and learning how we can work together to prevent future overdoses. By learning about the different ways that a decedent could have been helped, we can quickly close gaps in our overdose response system.

## 3 Mail out program

The DNP provides Narcan free of charge via mail in an effort to remove barriers to access.

**1,586**

doses have been mailed to the community in 2023.

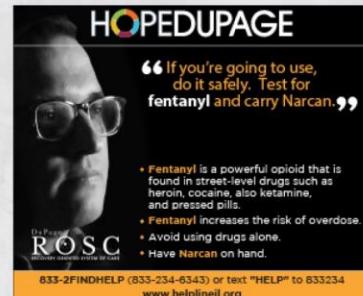

## 4 New partnerships

**50+**

schools became participating partners of the DNP in response to Public Act 103-0348.

## 5 Campaigns

Fentanyl awareness and harm reduction campaigns displayed through digital ads and in the community.

## DUPAGE NARCAN PROGRAM

**“**The DuPage Narcan Program has been an important collaborative partner for DuPage ROSC. From the beginning, our goals were aligned: making sure Narcan remains free and easy to access through community partner sites hosting Narcan wall-boxes and vending machines, and helping to prevent opioid overdoses through Narcan trainings and distribution of Fentanyl and Xylazine test strips.”

- Jarrett Burton, DuPage ROSC
